

This data has been released in response to an FOI request. Readers should be aware of its limitations and lack of predictive or comparative value for the following reasons: 1) Standardised scores don't tell you how many questions were (in)correctly answered. 2) Standardised scores are relative to that year group - if the year group is unusually strong or weak, the same raw performance can produce very different standardised scores. 3) These scores are age-adjusted for fairness, which can shift scores up or down by several points. 4) Different subjects have different difficulty profiles. 5) Pass marks/Eligible scores change each year, and differ by subject. With the results each year, we will release sufficient information for parents to make an informed decision about the likelihood of gaining a place at Reading School. Note about results: any oddities within the results may be as a result of EHCPs, Pupil/Service Premium declarations, applications from families of Looked After Children or late changes to address or application status.
